

September 2025 Quarterly Activities Report

Ardea Resources (ASX: ARL, **Ardea** or the **Company**) is pleased to report on the key activities and progress made during the September 2025 Quarter, including the Kalgoorlie Nickel Project (**KNP**) – Goongarrie Hub (the **Project**) Definitive Feasibility Study (**DFS**).

Ardea Corporate Activities:

- Ardea's development partners for the Kalgoorlie Nickel Project - Goongarrie Hub, Sumitomo Metal Mining Co., Ltd (SMM) and Mitsubishi Corporation¹ (MC) earned the first tranche of equity interest (17.5%) in the incorporated joint venture vehicle, Kalgoorlie Nickel Pty Ltd (KNPL)².
- As of 30 September 2025, Ardea remains in a strong financial position with \$15.5M cash on hand and no debt.
- Results of the reverse circulation (RC) infill drilling program at Goongarrie South were released³, confirming the deposit as the highest-grade nickel-cobalt (Ni-Co) deposit within the KNP – Goongarrie Hub, dominated by premium goethite mineralisation. These outstanding results were the final received for the geological RC infill program.
- KNPL executed a Heritage Agreement with the Marlinyu Ghoorlie Native Title Claimant Group⁴, covering protocols for heritage surveys, activities to protect identified sites and clearance procedures to simplify the approvals process for activities at the KNP – Goongarrie Hub.
- Ardea, supported by members of the KNPL team, hosted multiple site visits during the September 2025 Quarter, including a large investor and stakeholder site visit on the sidelines of the annual Diggers and Dealers Mining Forum in Kalgoorlie, and representatives of the Japanese Embassy in Canberra on site and at KNPL's Kalgoorlie offices.
- Ardea attended several strategic critical minerals events at the invitation of the Australian Federal and WA State Governments. Of particular note were a critical minerals delegation to the United States, and combined State and Federal events in Japan with a WA Government delegation.

Feasibility Work Programs for the Kalgoorlie Nickel Project – Goongarrie Hub:

- Zero lost time injuries in the period, with the health and safety of the Ardea and Project teams a top priority.
- KNPL submitted the Project's Lead Agency Status to the WA Dept. of Energy and Economic Diversification (DEED).
- The geology team continues to progress its Mineral Resource Estimate model updates in support of the updated mining schedule optimisation and Ore Reserve.
- As DFS testwork programs begin to complete progressively, the remainder of the KNPL team's focus is shifting to processing and interpretation of results and early drafting of the DFS report chapters.

³ See Ardea ASX release 22 September 2025

⁴ See Ardea ASX release 3 September 2025

With \$30M in committed funding remaining at the end of the Quarter and substantial progress made across key study areas, the Company is well positioned to complete all planned work associated with the ongoing DFS.

Managing Director and CEO Andrew Penkethman commented:

“The September 2025 Quarter has seen consistent and meaningful progress across all facets of the Kalgoorlie Nickel Project – Goongarrie Hub. With major drilling and metallurgical testwork programs now largely complete, the KNPL team is focused on interpreting results, refining models, completing detailed engineering design and drafting the initial chapters of the Definitive Feasibility Study. Collaboration between Ardea, SMM and MC remains a strength of the Project, ensuring that the full technical and commercial expertise of all partners is applied to deliver a world-class outcome.

During the Quarter, we advanced key ESG and approvals workstreams, including the execution of a Heritage Agreement with the Marlinyu Ghoorlie Native Title Claimant Group, while maintaining our exemplary safety performance and community engagement. These achievements, together with ongoing collaboration with Federal and State Governments and our strategic partners, reinforce the Project’s standing as a cornerstone Australian Critical Minerals development.

I want to thank the Ardea and KNPL teams, our Consortium partners, consultants, and stakeholders for their ongoing commitment and professionalism as we progress towards completion of the DFS and the development of the Goongarrie Hub as one of Australia’s most significant nickel and cobalt projects. Whilst the initial focus is on nickel and cobalt, we are conscious of the scandium within the deposit and the potential for additional Critical Mineral by-products. While they will not form part of the base case operational and economic assessment in the Definitive Feasibility Study, some opportunities are being catered for by, for example, leaving space within the process plant layout for a potential scandium refinery should studies demonstrate its feasibility.

Figure 1: Members of the WA Invest and Trade delegation to Japan, including Ardea’s Andrew Penkethman, at the World Expo in Osaka (September 2025)

1. KALGOORLIE NICKEL PROJECT – GOONGARRIE HUB

The Goongarrie Hub, 70km northwest of the City of Kalgoorlie-Boulder, hosts the premium ore feed within the broader KNP (Figure 1). Resources from the Goongarrie, Highway and Siberia North nickel-cobalt laterite deposits are planned to be the base load feed for a processing facility located at Goongarrie South.

The mineral resources at Goongarrie Hub are predominantly the premium goethite style and extend continuously over 25 km of strike at Goongarrie South-Big Four and a further strike length of 10 km (Figure 1) at Highway, 30 km to the north. All key Goongarrie Hub mineral resources are located on granted mining leases and are managed by KNPL. The Consortium are earning a 35% interest in KNPL by fully funding the KNP Goongarrie Hub DFS up to \$98.5M, and up to a 50% share on a positive Final Investment Decision (**FID**).

Ardea retains 100% of all non-Goongarrie Hub KNP tenements, including the Kalpini Hub (Kalpini, Bulong nickel projects and, at Yerilla, the Jump Up Dam, Boyce Creek, and Aubils nickel projects) (Figure 1). Ardea is assessing Kalpini as a Critical Minerals hub, having confirmed that the nickel laterite includes Rare Earth Elements⁵. This is an Ardea Research and Development (**R&D**) focus.

The KNP Goongarrie Hub has ready access to high-quality infrastructure, with the Goldfields Highway, rail line, fibre optic cable, and power infrastructure passing through the Project area (Figures 1 and 2). The Goldfields Gas Transmission pipeline is located ~30km to the east and has ready access to the ports of Fremantle or Esperance by road or rail.

Ardea is actively engaged with Federal and State agencies and statutory authorities who aim to unlock Australia's vast potential as a major supplier of the Critical Minerals needed to decarbonise the global economy. The KNP meets the objectives of the Federal Government's Critical Minerals Strategy. The Project will create a resilient and sustainable Critical Minerals supply chain, benefiting Australia, Japan, other key allies, the regions and communities in which the Company operates. The Project aligns with the Future Made in Australia Community Benefit Principles.

Figure 1: (left) KNP location plan. Projection GDA94 Zone 51.
Figure 2: (above) Aerial image at Ardea's Goongarrie Hub at Goongarrie South, looking south towards Kalgoorlie-Boulder, showing road and rail infrastructure within the granted mining leases upon which the resources are located.

⁵ See Ardea ASX Announcement, 14 March 2022.

Ardea's focus remains on developing the KNP – Goongarrie Hub, managed by Ardea's majority-owned subsidiary, KNPL, which is completing the Project DFS. Key activities undertaken during the September 2025 Quarter are outlined below.

Health and Safety

Health and safety remain of utmost importance to the Company, with key activities including:

- Safety Performance: Zero LTIs, MTIs and TRIs were recorded in the Quarter.
- Site field operations continued during the Quarter, with a reduced on-site personnel presence as major drilling programs were completed.
- The KNPL Kalgoorlie office supported mobilisation, supervision and ongoing inspections of various workplaces, predominantly Flora, Fauna and Heritage surveys.
- Vehicle monitoring systems and other controls remained in place for safe travel between accommodation and work sites.

Environmental, Social and (Corporate) Governance, Health and Community

Ardea and KNPL are committed to strong ESG performance, underpinning the sustainable development of the KNP. ESG-related initiatives progressed during the September 2025 Quarter and included:

- Execution of a Negotiation Protocol and Heritage Agreement between KNPL and the Marlinyu Ghoorlie Native Title Claimant Group during the quarter (See ARL ASX announcement 3 September 2025). Following execution of these agreements, KNPL will continue to work collaboratively with the Marlinyu Ghoorlie claim group to negotiate the terms of a Native Title Agreement.
- Planning has commenced for the rehabilitation of exploration areas across the Siberia and Goongarrie tenements.
- Substantial completion of Flora, Fauna and Heritage surveys at Scorpion East, with Heritage surveys to shift focus to the planned Goongarrie village and process plant sites during the December Quarter, 2025.
- On-country celebration of the successful Kakarra Part A Native Title determination, supported by KNPL and Ardea, was delayed. Ardea and KNPL representatives will attend and support the rescheduled on-country celebrations during the December Quarter, 2025.

Geology

Work carried out during the September 2025 Quarter focused on Resource modelling and interpretation, with the infill drilling program completed in the prior Quarter.

The Resource model for Big Four was completed and provided to KNPL's mining consultants to review ahead of commencing an updated mine plan, schedule and Ore Reserve. Geological models for Goongarrie Hill and Highway were advanced. At the same time, initial interpretations of new results from Goongarrie South are underway and will support the creation of updated geological models for this deposit.

Density and moisture data on the DFS diamond drilling core samples was finalised and provided to KNPL's geological consultants. This data, combined with historic data from previous drill programs, is an essential input to the mine models, and extensive validation and data checking was undertaken across data sources prior to submission.

Goongarrie South RC Infill drilling results

Results of the completed RC infill drilling program at the Goongarrie South nickel-cobalt-scandium deposit were announced during the Quarter⁶ confirming the grade and continuity of mineralisation.

⁶ See Ardea ASX Announcement, 22 September 2025.

Goongarrie South, dominated by premium goethite mineralisation, is the highest grade and largest nickel-cobalt deposit within the KNP – Goongarrie Hub, and one of the closest deposits to the proposed processing plant. The increased drill density supports potential upgrades of the Mineral Resource classification to Measured and subject to mine planning, and other modifying factors being applied, additional Proven Ore Reserves for the DFS.

The drilling program, with deeper drilling than historic programs, also identified previously untested Mineralised Neutraliser at Goongarrie South, which may support deeper optimised pit designs in the DFS. If confirmed during the detailed MRE update and bench-scale metallurgy R&D currently underway, this could provide both operating and capital cost benefits in the early stages of the Project's development and operation.

Key, high-grade intercepts announced include:

- | | |
|---|---|
| ➤ 34m at 1.75% Ni from 12m (KGSR0092)
[Inc. 32m at 1.82% Ni from 14m] | ➤ 26m at 1.48% Ni from 22m (KGSR0118)
[Inc. 22m at 1.61% Ni from 24m] |
| ➤ 26m at 1.30% Ni from 14m (KGSR0089)
[Inc. 18, at 1.51% Ni from 20m] | ➤ 26m at 1.23% Ni from 18m (KGSR0172)
[Inc. 14m at 1.61% Ni from 30m] |

Ore Reserve

The 2023 Preliminary Feasibility Study (PFS)⁷ defined an Ore Reserve of **194.1Mt at 0.70% Ni and 0.05% Co** for 1.36Mt contained nickel and 99kt contained cobalt (Appendix 1 - Table 2). Other Goongarrie Hub deposits (Ghost Rocks, Siberia South and Black Range) have not been included in the current Ore Reserve but provide potential to significantly extend the mine life.

Hydrogeology & Geotechnical

All mineral resources at Goongarrie are located on granted mining leases. As such, KNPL have first rights to any groundwater underlying these areas. Past work defined multiple water sources outside the mine area, with water for Project development to be sourced from multiple KNPL borefields.

Progress during the Quarter included:

- The initial test pumping program at Goongarrie was completed with strong water flows. Significantly, water potentially suitable for use as process water was identified as part of Big Four pit-dewatering studies.
- Hydrogeological models were developed and prepared for review.
- Preparations were made for additional process water source testing, with a program of water bore drilling and test pumping prepared for execution during the December Quarter, 2025.
- Preliminary geotechnical recommendations for pit walls, slopes and pillar designs were received during the Quarter, which broadly aligned with the parameters used in the 2023 PFS.

Exploration Incentive Scheme (EIS)

During Round 29 of the co-funded EIS, two drill holes of PQ/HQ diameter DD were completed at Highway for a total of 378.9m.

The drilling successfully intercepted intrusive system lithologies and more clearly defined structural controls for the emplacement of felsic intrusive units and alteration zones underlying the nickel laterite. The added understanding of structural controls is beneficial as the development of the laterite results in near-surface structural features being over printed.

Lithium-caesium intrusives with very high rubidium were identified in the previous EIS drill hole AHID0024 (ARL:ASX announcements 11 February 2022, 21 August 2023, 15 December 2023).

⁷ ASX release 5 July 2023

Along with historic drill holes at Highway, a highly fractionated fertile Lithium-Caesium-Tantalum (**LCT**) mineral system is confirmed. Significant intersections in AHID0024 included:

- 21.2m at 0.23% Li_2O , 945ppm Cs, 1,237ppm Rb from 406.8m
- 0.85m at 0.34% Li_2O , 3,392ppm Cs, 4,222ppm Rb from 368.75m
- 0.95m at 0.15% Li_2O , 3,000ppm Cs, 4,830ppm Rb from 390.85m

Contacts are interpreted as intrusive lithologies emplaced in planes of weakness of the Walter Williams Formation contact zones. This interpretation is supported by the outcropping Walter Williams Formation showing similar structural orientations.

Figure 3 (Right): Wireline/Geophysical logging at the Goongarrie Hub

Metallurgy

- The majority of planned testwork was completed during the September Quarter, 2025.
- Draft testwork reports have been received, with most reporting expected to be finalised during the December Quarter, 2025.
- The team's focus will move from managing testwork to the review and incorporation of results and references into the appropriate DFS chapters.
- An additional batch of tailings consolidation testwork will commence in the December Quarter, 2025, along with selected reagent trials from several potential suppliers.

Process Plant

Process plant design and engineering work during the September 2025 Quarter included:

- All process flow diagrams (**PFDs**) and piping and instrumentation diagrams (**P&IDs**) were approved as issue for study (**IFS**) during the Quarter.
- The Process Design Criteria (**PDC**) was substantially completed, with finalisation of the PDC anticipated in the December Quarter, 2025.
- The process plant 3D model was completed.
- DFS report writing has commenced.
- Ausenco workstreams in the DFS engineering are expected to be completed in the December Quarter, 2025.

Processing Research and Development (R&D)

The Ardea FY2025 R&D study is based upon multi-element geometallurgical research to optimise plant feed to a multi-option plant. The requisite metallurgical experiments are being finalised to optimise plant performance, product range, and, consequently, revenue streams from the KNP and its Goongarrie Hub. This is fundamental to delivering the KNP as a world-competitive Critical Minerals Project.

Global Patent Application – Mineralised Neutraliser

- Ardea lodged patent applications in Australia (AU2022903389) on 11 November 2022 and with the World Intellectual Property Office (**WIPO**) on 13 June 2023: PCT/AU2023/050520 relates to the use of Mineralised

Neutraliser (**MN**) in the unique Ardea process. Ardea filed Australian patent application 2023377792 in 2025, and this application is pending at IP Australia. Research on this workstream continues.

- Current R&D using litho-geochemistry identified a significant MN contribution from high in the regolith profile in what is now termed Relic Saprock (usually within 20m of surface). The results to date from several deposits are encouraging.
- Following the MN research concept, a comparable study is underway for comminution enhancement.

CSIRO Collaboration

- A paper on the geology of Goongarrie was published by Australia's national science agency CSIRO, *Geochemical behaviour of gold and critical metals in the Goongarrie Ni-laterites, Western Australia* and can be accessed here: <https://www.sciencedirect.com/science/article/pii/S016913682500410X>.

Australian Research Council

- Ardea continues to support the Australian Research Council's (**ARC**) Industrial Transformation Training Centre in Critical Minerals.

Non-Process Infrastructure (NPI)

Progress during the September 2025 Quarter included:

- NPI services report and capital cost estimate (**CCE**) was issued for internal review.
- CCE finalised for the Goongarrie Hub accommodation village.

Environment and Rehabilitation

All Project development aims to include systematic rehabilitation concurrent with operations.

Due to the expanded development footprint of the Goongarrie Hub, as defined in the 2023 PFS⁸, baseline surveys completed in 2018 have been extended and aligned with the latest regulatory guidance. Surveys have also been extended to the new borefield and pipeline areas west of the Goongarrie Hub and these will continue into the Spring season. Reports outlining the results of all surveys are expected during the March Quarter, 2026.

Completing the remaining non-seasonal dependent baseline studies will allow further assessment of the need for the Project to be formally assessed under the State Environmental Protection Act (**EP Act**) and the Commonwealth Environment Protection and Biodiversity Conservation Act (**EPBC Act**). If it can be shown that environmental impacts are low and/or can be adequately managed by other regulatory agencies using different mechanisms, the Environmental Protection Authority (**EPA**) may make an assessment on the referral that the Project is not to be formally assessed.

Similarly, if the EPA believes impacts on some factors are not significant and can be adequately managed by other regulatory agencies using different mechanisms, the number of Key Factors to be assessed by the EPA under the Part IV process could be reduced.

Mine rehabilitation methodology is facilitated through four decades of Western Australian (**WA**) open pit gold mine operations, and the KNP footprint is minimised using mining voids for tailings and mullock disposal. Mining voids will be progressively rehabilitated during operations by dressing the backfilled open pit voids with stockpiled topsoil (Figure 4) and then revegetating. Local and Indigenous contractors will be given specific opportunities to tender for revegetation works.

⁸ ASX release 5 July 2023

Figure 4: - left: Planned Goongarrie Hub in-pit tails disposal and rehabilitation strategy. Above- Showing scarification of disturbed areas, during rehabilitation of Goongarrie South drill sites.

Approvals

- KNPL's application for Lead Agency Status was submitted to the Department of Energy and Economic Diversification (**DEED**, formerly JTSI) during the Quarter. KNPL's Project Director and Head of Approvals and Compliance attended a meeting with DEED to provide an update on the KNP – Goongarrie Hub. The KNPL team were offered further detail on DEED's review and assessment process.
- Subsequent to the end of the September Quarter, Ardea's Kalgoorlie Nickel Project – Goongarrie Hub Major Project Status three-year renewal submission, submitted in the March Quarter, 2025, has been renewed for a further three-year term until 10 October 2028 (see ASX announcement dated 20 October 2025).

DFS Schedule Update

Ardea advised the market during the quarter that the DFS schedule for the Goongarrie Hub had been updated, with DFS completion now forecast for midway through the first half of calendar year 2026⁹. The delay is due to the cumulative effect of minor delays across several work streams, with the DFS originally scheduled for completion in December 2025.

⁹ ASX release 8 September 2025

2. KALGOORLIE NICKEL PROJECT – KALPINI HUB

With the Goongarrie Hub sole-funded by the Consortium to DFS completion with a budget of \$98.5 million, Ardea is undertaking Nickel Laterite scoping level feasibility reviews and Nickel Sulphide target generation for the Kalpini Hub (Kalpini and Bulong Nickel Projects, Emu Lake nickel sulphide) and Yerilla projects (Aubils, Boyce Creek and Jump Up Dam Nickel Projects) as shown in Figure 7. These “non-Goongarrie Hub” projects are collectively termed the “Kalpini Hub”.

Kalpini Nickel Project

Ardea’s Kalpini Nickel Project is located 70km northeast of the City of Kalgoorlie-Boulder and covers 121km² of contiguous unencumbered granted tenure 100%-owned by Ardea (Figures 6 and 7). Regionally, there are two distinct Kalpini ultramafic units, each with a 20-25km strike within Ardea tenure (Figure 6):

- The Kalpini Eastern Komatiite Belt hosts the Wellington East and Acra North nickel laterite deposits containing 75Mt at 0.73% nickel and 0.04% cobalt, for 549.7kt nickel and 32.6kt cobalt (Appendix 1 - Table 1) (ASX release 30 June 2023). The ultramafics are typical of the Walter Williams Formation style, consisting of a thick 200-600m sheet with olivine orthocumulate upper and lower contacts and core olivine meso-adcumulate (Dunitic Sheet Flows-Layered Lava Lakes). The flow core weathers to nickel laterite. Based on current Ardea research, the lower orthocumulate basal contact is considered prospective for nickel sulphide.
- The Kalpini Western Komatiite Belt hosts the Emu Lake, Binti Binti nickel sulphide mineralisation. There are at least two fertile nickel sulphide ultramafic flows at Emu Lake. The volcanics are characterised by a bi-modal co-magmatic suite, with each cycle having a footwall dacite volcanic overlain by ultramafic volcanic flows. The ultramafics are orthocumulate flows typically 10-40m thick, with massive, matrix, blebby and disseminated nickel sulphides identified in the Western Ultramafic (**WU**) and Central Ultramafic (**CU**).

Nickel Laterite Studies

From R&D programs, the Kalpini Nickel Project includes Nickel Laterite mineralisation associated with significant Rare Earth Element (**REE**) and Scandium credits (Figure 5).

At the Wellington East Prospect, re-sampling historic drill pulps by Ardea during 2020 to 2022 identified significant REE and Rare Metal (**RM**) grades within the historic nickel-cobalt laterite mineralisation (ASX Release 14 March 2022), including:

- WERC0371: 12m at 1.70% nickel, 0.151% cobalt, 28g/t scandium from 20m with;
 - **0.244%** Total Rare Earth Oxide (**TREO**) includes neodymium (Nd), praseodymium (Pr), lanthanum (La), cerium (Ce)
 - **1.320%** Total Rare Metal Oxide (**TRMO**) includes titanium (Ti), yttrium (Y), zircon (Zr), niobium (Nb), hafnium (Hf), tantalum (Ta) and tungsten (W)
- VKPRC0112: 4m at 1.66% nickel, 0.102% cobalt, 40g/t scandium from 29m with;
 - **0.1297% TREO**
 - **0.7193% TRMO**

Figure 5: Northern Kalpini Nickel Project, aeromagnetic image showing historic drillholes as black dots, and if available, % Total Rare Earth Oxide (TREO) assays, colour coded as per the map legend.

The Kalpini REE mineralisation occurs within the Regolith Cycle 1 Enrichment Zone of the main Nickel Laterite. In contrast, scandium is more enriched within younger Regolith Cycle 2 Laterite Duricrust overlying the Nickel Laterite.

Ardea scandium intercepts (ASX Release 22 June 2017) include:

- AKR0015, **20m at 102ppm scandium** from 38m AKR0017, **6m at 463ppm scandium** from 28m.

Geo-metallurgy

A systematic R&D review of historic geo-metallurgical data is ongoing, aimed at progressing the Kalpini Hub Material Types and plant feed destinations to be compatible with the models now used in the Goongarrie Hub DFS. The Kalpini research confirms the Goongarrie three regolith cycle model, from pedogenic surface to bedrock:

- Regolith Cycle 3, quartz sand with carbonate cement, <0.1% Ni.
- Regolith Cycle 2, haematite-dominant duricrust and mottled clay, <0.3% Ni.
- Regolith Cycle 1, goethite-dominant mineralised host, >0.5% Ni, the upper contact with Cycle 2 includes a Relic leached horizon with Void-fill clay (termed “RV” in geomet) that significantly includes MN that is invariably recovered in pit designs.

Research on gallium within the Regolith Cycle 2 haematitic duricrust and associated with scandium has been initiated.

Nickel Sulphide Exploration

Ardea’s extensive and strategic land holding in the Eastern Goldfields of WA comprises >3,480km² of tenements. In addition to the globally significant nickel-cobalt-scandium KNP resources, it is highly prospective for nickel sulphides and other Critical Minerals, notably REE (Figure 6).

Nickel sulphide also has potential value for a nickel laterite operation, as it can be added to any goethite autoclave feed for exothermic heating (optimising steam use), reducing Eh to control hexavalent chromium, and adding nickel and sulphur units to the autoclave reaction vessel, thereby typically improving overall nickel recoveries.

An additional benefit is that metal concentrations considered deleterious to conventional nickel sulphide flotation concentrator processing do not affect the HPAL process, opening the possibility of mineral extraction from nickel sulphide deposits that may otherwise be overlooked.

R&D included gravity recovery of a potentially saleable chromite product.

Figure 6: Ardea tenement plan highlighting the location of the Kalpini Hub, Emu Lake Nickel Sulphide Camp and nickel mines and deposits in the region. Projection MGA 94 Zone 51.

The massive nickel-copper-PGE sulphides discovered at the Binti Prospect in the Kalpini Project (i.e. AELD0003: **2.72m at 5.42% Ni and 0.85% Cu from 391.04m¹⁰**) occur in the Kurnalpi Terrane. Ardea holds over 20km of strike of the prospective Western Ultramafic sequence, which is largely unexplored and highly prospective for primary magmatic nickel sulphide mineralisation (Figure 7).

The plan for the Kalpini Hub is to postpone proposed nickel sulphide drill exploration activities until after the KNPL priority DFS workstreams have been finalised. Low cost/low impact work such as geo-metallurgical interpretation continued during the Quarter.

Figure 7: The Kalpini Project showing interpreted geology and Komatiite Belts. The historic nickel laterite resources are located on the Eastern Komatiite Belt, with the Western Belt highly prospective for nickel sulphide (NiS) mineralisation (Ardea ASX release 14 January 2022). Tenements are shown, with NiS targets (stars) (Ardea ASX release 2 May 2023). Projection MGA 94 Zone 51.

¹⁰ ASX release 14 January 2022

3. Nickel and Cobalt Sector Commentary

- The London Metal Exchange (**LME**) three-month nickel price was stable during the September 2025 Quarter¹¹, broadly range bound between US\$15,000 and US\$15,500. Cobalt metal prices were stable for most of the Quarter at approximately US\$33,000/t, similar to the previous Quarter, but spiked late in September 2025 to approximately US\$35,000/t. LME Nickel stock levels continued to rise¹², up ~25,000t to end the Quarter at ~230,000t.
- Nickel demand from the battery sector recorded strong growth of 27% year-on-year in 2024 (Benchmark 14 November 2024). Benchmark forecasts demand will continue to grow, driven by an expanding Electric Vehicle (**EV**) and battery energy storage systems (**ESS**) market (Figure 9), with global EV sales up 24% year on year to the end of June 2025 (Rho Motion). While demand growth forecasts are underpinned by stainless steel and battery growth, new industries, such as data centres, and technology like AI will also contribute (Peak Asset Management, 6 January 2025). Fastmarkets 2024-27 forecast shows reducing nickel surpluses, with a supply gap emerging from 2028, with forecast nickel prices correspondingly rising (Figure 8).
- While much of the battery industry narrative in recent years has centred around the rise of LFP technology in China, nickel-based chemistries such as Nickel Cobalt Manganese (**NCM**) are expected to retain a significant share of the battery market outside China. Most lithium-ion battery producers with whom Ardea has engaged, opt for nickel cathode chemistries containing ≥90% nickel.
- While short-term oversupply out of Indonesia is depressing current prices, the long-term outlook indicates that higher prices will be needed to meet projected battery demand to power the growing EV/ESS market, while demand from traditional nickel markets, such as stainless steel, is also expected to continue to grow.
- Ardea considers the current downturn in the Australian nickel sector as an opportune time to be completing the DFS and ultimately developing the Goongarrie Hub, as the Company is experiencing increased access to appropriately skilled and experienced personnel and service providers, allowing KNPL to assemble an elite Owners Team. In this environment, there is increased opportunity to contain costs and maximise Project Value Engineering.

Figure 8: Nickel Market Balance and Price Forecast.
After Fastmarkets' long-term forecasts for 2024.

Figure 9: Battery demand will grow 7-fold by 2040, while high-nickel cathodes will increase nickel demand over the long term.

4. CORPORATE

Finance

The Company's cash position was \$15.5M at Quarter end with no debt.

The Consortium is fully funding the DFS costs up to the agreed budget of \$98.5M¹³. As of 30 September 2025, the remaining balance for Consortium DFS funding is \$30M.

Issued capital at 30 September 2025 was 210.4M Shares, with 3.5M Performance Rights and 3M Options.

Summary of Expenditures for the Quarter

During the Quarter, the Company incurred a total net expenditure from operating activities of \$17.9M. This expenditure included \$16.6M expended on exploration and evaluation activities, including \$16M for feasibility studies, \$1.1M on staff costs and \$409k for administrative and corporate expenses.

Included in these costs were payments made to the Directors of the entity and their associates. These payments were Directors' salaries, Executive Directors' bonuses, and superannuation payments.

During the Quarter, the Company received \$41k in interest, \$121k in other revenue, and \$18.8M from the Consortium for budgeted DFS funding.

Further details on Quarterly expenditures are included in the Appendix 5B – Quarterly Cashflow Report attached to this Quarterly Report.

Strategic Partners

- SMM and MC are fully funding the Project DFS up to \$98.5M. Ardea's majority (82.5%) owned subsidiary, KNPL, is managing the DFS.
- After the DFS spend, the Consortium will have subscribed to a 35% ownership in KNPL and retain the right to increase its ownership in KNPL to 50% upon a positive Final Investment Decision by the Consortium.
- During the September 2025 Quarter, Ardea Managing Director and CEO, Andrew Penkethman, KNPL Project Director, Matthew Read, and their teams continued to welcome the Consortium to their West Perth offices for DFS technical meetings and to further the collaboration between Ardea, KNPL, SMM, and MC.
- Ardea, supported by its strategic advisor, ICA Partners, and the Consortium, continue to discuss the optimum funding strategy after completing the DFS. This is a priority workstream for 2025. Both SMM and MC have enviable track records of success and strong connections to potential debt and equity providers, which can assist in financing optimisation.

Investor Relations and Stakeholder Engagement

During the September 2025 Quarter, management continued engagement with multiple Federal and State stakeholders. Ardea management and staff also attended several industry events, including:

- Hosting a successful investor and stakeholder site visit to the Goongarrie Hub, on the sidelines of the Annual Diggers and Dealers Mining Forum in Kalgoorlie. Ardea and KNPL staff jointly attended the conference, with Andrew presenting an update on the KNP in the main auditorium.
- Ardea attended the Noosa Mining Conference, meeting with several East Coast shareholders and fund managers, as well as presenting to the conference delegates.
- Ardea and KNPL hosted a visit to the Kalgoorlie office, core shed and Goongarrie Hub Project site for representatives of the Japanese Embassy in Canberra.
- Ardea attended a U.S. Critical Minerals Delegation, coordinated by Austrade, the Dept. of Foreign Affairs and Trade, and the Dept. of Industry, Science and Trade during September 2025, meeting with a range of representatives from the Australian and US Government and Industry bodies. The mission outlined the

¹³ ASX Release 30 August 2024 "KNP – Goongarrie Hub JV Transaction Complete..."

strategic priorities of the United States Government and how Australian Critical Mineral companies can best engage, with the support and assistance of the Australian Federal Government.

- Ardea travelled to Japan for in-person meetings with senior SMM and MC representatives, as well as attending a Critical Minerals Roundtable at the Australian Embassy in Tokyo and the WA Government's delegation at the Osaka World Expo along with WA Premier Roger Cook, Federal Minister for Resources Madeleine King, and WA Mines and Petroleum Minister David Michael.

Figure 10: Ardea Resources Managing Director and CEO Andrew Penkethman with the attendees of the Critical Minerals Roundtable Event at the Australian Embassy in Tokyo (top) and meeting with the Hon. Madeleine King MP – Minister for Resources and Minister for Northern Australia, and Australian Ambassador to Japan, Justin Hayhurst, as part of the WA Government's delegation to the World Expo in Osaka (left)

5. LOOKING FORWARD

Kalgoorlie Nickel Project – Goongarrie Hub DFS

Ardea will continue to work with all stakeholders, including the Consortium, industry groups and Federal, State and Local Governments to ensure Project development is predicated on the highest industry standards, notably ESG.

Kalgoorlie Nickel Project – Goongarrie Hub DFS

- Drafting chapters of the DFS report for initial internal review, primarily on processing and NPI as final results become available.
- Mineral Resource Estimate Updates:
 - Continue work on geology domain interpretations for DFS Mineral Resource Estimates (**MRE**)
 - Continue with resource block model updates for key deposits in the initial mining plan to support potential Resource upgrades
 - Updated and optimise the mine schedules, subject to the MRE updates.
- Progress Heritage, Native Title and Approvals workstreams.

Strategic Partner Relationship

- Continue working collaboratively with the Consortium toward completing the DFS and Project development Funding Strategy.

Stakeholder Engagement

- Community consultation with our First Nations groups, the City of Kalgoorlie-Boulder, Shire of Menzies, Southern Ports Esperance and all other stakeholders.
- Continue engagement with groups such as the Australian Commonwealth Government, Austrade, Department of Foreign Affairs and Trade, Critical Minerals Office, Export Finance Australia, Major Projects Facilitation Agency, WA State Government agencies, and for R&D, the FBICRC, Australian Research Council and CSIRO.

Investor Relations

Regular engagement with Shareholders and investors will continue in person and through Ardea's website, LinkedIn, and Twitter (X) accounts.

Stakeholders are welcome to subscribe for Ardea updates: [click here](#)

About Ardea Resources

Ardea Resources (ASX:ARL) is an ASX-listed nickel development company in joint venture with Sumitomo Metal Mining and Mitsubishi Corporation to build, commission and operate a plus 30,000tpa multi-decade nickel operation¹⁴:

- Development of the Kalgoorlie Nickel Project (**KNP**) and its sub-set, the Goongarrie Hub, a globally significant series of nickel-cobalt and Critical Mineral deposits which host the largest nickel-cobalt resource in Australia and one of the largest in the developed World at **854Mt at 0.71% nickel and 0.045% cobalt for 6.1Mt of contained nickel and 386kt of contained cobalt**. The Goongarrie Hub has 584Mt for 4.0Mt of contained nickel (Ardea 82.5% ownership, Consortium right to earn up to 50%) and Kalpini Hub has 270Mt for 2.1Mt of contained nickel (Ardea 100% unencumbered interest) (Ardea ASX release 30 June 2023), located in a jurisdiction with exemplary Environmental Social and Governance (**ESG**) credentials.
 - Scoping Study initial programs being planned for the Kalpini Hub nickel-cobalt resources.
- Advanced-stage exploration at compelling nickel sulphide targets, such as Kalpini, and Critical Minerals targets including scandium and Rare Earth Elements throughout the KNP Eastern Goldfields world-class nickel-gold province, with all exploration targets complementing the KNP nickel development strategy.

COMPLIANCE STATEMENT (JORC CODE (2012))

A competent person's statement for the purposes of Listing Rule 5.22 has previously been announced by the Company for:

1. Kalpini drill results highlight cobalt-nickel mineralisation, and scandium discovery, 22 June 2017.
2. Emu Lake Nickel Sulphide Discovery confirmed with 2.72m at 5.42% Ni, 14 January 2022.
3. High-grade Nickel-Cobalt Confirmed at Kalpini with Scandium and Rare Earth Elements, 14 March 2022.
4. Kalgoorlie Nickel Project Recognition on All Tiers of Australian Government, 21 March 2022.
5. Nickel sulphide anomalism from aircore drilling at Kalpini Project, 2 May 2023.
6. Mineralised Neutraliser Global Patent Lodged, 15 June 2023.
7. Kalgoorlie Nickel Project Mineral Resource Estimate Exceeds 6 Million Tonnes Contained Nickel, 30 June 2023.
8. KNP - Goongarrie Hub Ore Reserve and Feasibility Study Defines +40 Year Operation with Strong Financial Metrics, 5 July 2023.
9. Nickel Sulphide Prospectivity Confirmed and Lithium-Caesium-Rubidium bearing intrusives in Highway EIS drillhole, 15 December 2023.
10. Kalgoorlie Nickel Project - Goongarrie Hub DFS Drilling Underway, 4 July 2024.
11. Kalgoorlie Nickel Project – Goongarrie Hub DFS Underway, 8 July 2024.
12. Annual Report 2024, 13 September 2024.
13. Big Four & Scotia Dam RC Infill Drilling Program Complete, 14 April 2025.
14. Highway RC Infill Drilling Program Complete, 25 June 2025.
15. Goongarrie Hub Project DFS Reaches Major Milestone, 4 July 2025.
16. Heritage Agreement signed with Marlinyu Ghoorlie Claim Group, 3 September 2025.
17. Kalgoorlie Nickel Project – Goongarrie Hub DFS Update, 8 September 2025.
18. Goongarrie South RC Infill Drilling Program Complete, 22 September 2025.
19. Annual Report 2025, 24 September 2025
20. KNP's Major Project Status renewed by Federal Government, 20 October 2025.

Competent Persons Statement

Resource Estimation, Exploration Results, and Industry Benchmarking

The Resource Estimation, Exploration Results and Industry Benchmarking summaries are based on information reviewed or compiled by Mr Andrew Penkethman, a Competent Person who is a Fellow of the Australasian Institute of Mining and Metallurgy and a Member of the Australian Institute of Geoscientists. Mr Penkethman is a full-time employee of Ardea Resource Limited and has sufficient experience, which is relevant to the style of mineralisation and type of deposit under consideration and to the activity which he is undertaking to qualify as a Competent Person as defined in the 2012 edition of the Australasian Code for Reporting of Exploration Results, Mineral Resources and Ore Reserves'. Mr Penkethman has reviewed this press release and consents to the inclusion in this report of the information in the form and context in which it appears. Mr Penkethman owns Ardea shares. The Company confirms that it is not aware of any new information or data that materially affects information included in previous announcements, and all material assumptions and technical parameters underpinning the estimates continue to apply and have not materially changed. Ardea wishes to clarify that its current Kalgoorlie Nickel Project (KNP) Mineral Resource Estimate (MRE) following JORC Code (2012) guidelines is:

KNP Hub	Resource Category	Size (Mt)	Ni (%)	Co (%)	Cont. Ni (kt)	Cont. Co (kt)

1. The Goongarrie Hub is part of KNPL Incorporated Joint Venture. See 30 August 2024 ASX release, KNP Goongarrie Hub Joint Venture Transaction Completion with Japanese Consortium. The Goongarrie Hub Resources are reported on a 100% basis, with Ardea holding an 82.5% interest.
2. The KNP Kalpini and Yerilla Hubs are known collectively as the Kalpini Hub and remain a 100% owned Ardea asset.

Note: 0.5% nickel cutoff grade used to report resources. Minor discrepancies may occur due to rounding of appropriate significant figures.

The Mineral Resource Estimate information shown in this ASX release has been previously released on the ASX platform by Ardea in ASX release 30 June 2023, in accordance with Listing Rule 5.8. The Mineral Resource Estimate in the above table is inclusive of the Ore Reserve shown in table two of this release.

The Ore Reserve information shown in this ASX release has been previously released on the ASX platform by Ardea in ASX release 5 July 2023, in accordance with Listing Rule 5.9. The Company confirms that it is not aware of any new information or data that materially affects the information included in the previous market announcements noted above and that all material

assumptions and technical parameters underpinning the Mineral Resource Estimate and Ore Reserve in the previous market announcements continue to apply and have not materially changed. The Company confirms that the form and context in which the Competent Persons' findings are presented have not been materially modified from the original market announcements.

ASX CHAPTER 5 COMPLIANCE AND PFS CAUTIONARY STATEMENT

The Company has concluded that it has a reasonable basis for providing the forward-looking statements and forecast financial information included in this announcement. The detailed reasons for that conclusion are outlined throughout this announcement and all material assumptions, including the JORC modifying factors, upon which the forecast financial information is based are disclosed in this announcement. This announcement has been prepared in accordance with the JORC Code (2012) and the ASX Listing Rules.

The actual results could differ materially from a conclusion, forecast or projection in the forward-looking information. Certain material factors were applied in drawing a conclusion or making a forecast or projection as reflected in the forward-looking information.

The KNP - Goongarrie Hub Project is at the PFS phase and although reasonable care has been taken to make sure that the facts are accurate and/or that the opinions expressed are fair and reasonable, no reliance can be placed for any purpose whatsoever on the information contained in this document or on its completeness. Actual results and developments of projects and the scandium market development may differ materially from those expressed or implied by these forward-looking statements depending on a variety of factors.

A key conclusion of the PFS, which are based on forward looking statements, is that the Goongarrie Hub is considered to have positive economic potential.

The Mineral Resource used for the PFS was classified under JORC Code (2012) Guidelines and announced by the Company on 30 June 2023. The cut-off grades adapted for the PFS and reported in Table 2 are the basis of the production target assumed for the PFS.

The Company believes it has a reasonable basis to expect to be able to fund and further develop the KNP - Goongarrie Hub. However, there is no certainty that the Company can raise funding when required.

CAUTIONARY NOTE REGARDING FORWARD-LOOKING INFORMATION

This news release contains forward-looking statements and forward-looking information within the meaning of applicable Australian securities laws, which are based on expectations, estimates and projections as of the date of this release.

This forward-looking information includes, or may be based upon, without limitation, estimates, forecasts and statements as to management's expectations with respect to, among other things, the timing and amount of funding required to execute the Company's programs, development and business plans, capital and exploration expenditures, the effect on the Company of any changes to existing legislation or policy, government regulation of mining operations, the length of time required to obtain permits, certifications and approvals, the success of exploration, development and mining activities, the geology of the Company's properties, environmental risks, the availability of labour, the focus of the Company in the future, demand and market outlook for precious metals and the prices thereof, progress in development of mineral properties, the Company's ability to raise funding privately or on a public market in the future, the Company's future growth, results of operations, performance, and business prospects and opportunities. Wherever possible, words such as "anticipate", "believe", "expect", "intend", "may" and similar expressions have been used to identify such forward-looking information. Forward-looking information is based on the opinions and estimates of management at the date the information is given, and on information available to management at such time. Forward-looking information involves significant risks, uncertainties, assumptions, and other factors that could cause actual results, performance or achievements to differ materially from the results discussed or implied in the forward-looking information. These factors, including, but not limited to, fluctuations in currency markets, fluctuations in commodity prices, the ability of the Company to access sufficient capital on favourable terms or at all, changes in national and local government legislation, taxation, controls, regulations, political or economic developments in Australia or other countries in which the Company does business or may carry on business in the future, operational or technical difficulties in connection with exploration or development activities, employee relations, the speculative nature of mineral exploration and development, obtaining necessary licenses and permits, diminishing quantities and grades of mineral reserves, contests over title to properties, especially title to undeveloped properties, the inherent risks involved in the exploration and development of mineral properties, the uncertainties involved in interpreting drill results and other geological data, environmental hazards, industrial accidents, unusual or unexpected formations, pressures, cave-ins and flooding, limitations of insurance coverage and the possibility of project cost overruns or unanticipated costs and expenses, and should be considered carefully. Many of these uncertainties and contingencies can affect the Company's actual results and could cause actual results to differ materially from those expressed or implied in any forward-looking statements made by, or on behalf of, the Company. Prospective investors should not place undue reliance on any forward-looking information.

Although the forward-looking information contained in this news release is based upon what management believes, or believed at the time, to be reasonable assumptions, the Company cannot assure prospective purchasers that actual results will be consistent with such forward-looking information, as there may be other factors that cause results not to be as anticipated, estimated or intended, and neither the Company nor any other person assumes responsibility for the accuracy and completeness of any such forward-looking information. The Company does not undertake, and assumes no obligation, to update or revise any such forward-looking statements or forward-looking information contained herein to reflect new events or circumstances, except as may be required by law.

No stock exchange, regulation services provider, securities commission or other regulatory authority has approved or disapproved the information contained in this release.

Notes:

1. The Ore Reserve is reported in accordance with JORC Code (2012). The Ore Reserve information shown in this ASX release has been previously released on the ASX platform by Ardea in ASX release 5 July 2023, in accordance with Listing Rule 5.9.
2. Ore reserves are reported at a cut-off of 0.5% Ni for primary feed stock to the processing facility, plus mineralised neutraliser as ore at a cut-off of 0.25% Ni and Loss on Ignition (LOI) above 25%.
3. The Ore Reserve was evaluated using a base price of US\$22,000/t for Ni and US\$51,000/t for Co at 85% payable for a Mixed Hydroxide Precipitate (MHP) product, and an exchange rate 0.69 USD/AUD.
4. Ore Reserves account for mining dilution and mining ore loss.
5. Ore Reserves are reported on a Dry Tonnage Basis.
6. Proven Ore Reserves are based on Measured Mineral Resources only and Probable Ore Reserves are based on Indicated Mineral Resources only.
7. The sum of individual amounts may not equal due to rounding.
8. This Ore Reserve estimate is for a subset of the KNP Goongarrie Hub deposits Mineral Resources, being Goongarrie South, Big Four / Scotia Dam, Goongarrie Hill, Highway and Siberia North. Those Mineral Resources are inclusive of the Ore Reserves shown in this table.
9. The Goongarrie Hub Ore Reserve is reported here on a 100% basis, with Ardea holding an 82.5% interest.
10. The Ore Reserve Summary was detailed in ARL ASX PFS Announcement, 5 July 2023.

4.4	Net cash from / (used in) financing activities (item 3.10 above)	18,778	18,778

Mining exploration entity or oil and gas exploration entity quarterly cash flow report

Consolidated statement of cash flows		Current quarter \$A'000	Year to date (3 months) \$A'000
4.5	Effect of movement in exchange rates on cash held	-	-
4.6	Cash and cash equivalents at end of period	15,554	15,554

5.	Reconciliation of cash and cash equivalents at the end of the quarter (as shown in the consolidated statement of cash flows) to the related items in the accounts	Current quarter \$A'000	Previous quarter \$A'000
5.1	Bank balances	10,020	9,186
5.2	Call deposits	-	-
5.3	Bank overdrafts	-	-
5.4	Other (provide details)	5,534	5,497
5.5	Cash and cash equivalents at end of quarter (should equal item 4.6 above)	15,554	14,683

6.	Payments to related parties of the entity and their associates	Current quarter \$A'000
6.1	Aggregate amount of payments to related parties and their associates included in item 1	377
6.2	Aggregate amount of payments to related parties and their associates included in item 2	-
<i>Note: if any amounts are shown in items 6.1 or 6.2, your quarterly activity report must include a description of, and an explanation for, such payments.</i> <i>Salaries, Directors fees and Consulting fees paid to Directors - \$331k</i> <i>Payments for Kalgoorlie Office to a Director related entity for the quarter - \$28k</i>		

7.	Financing facilities <i>Note: the term "facility" includes all forms of financing arrangements available to the entity.</i> <i>Add notes as necessary for an understanding of the sources of finance available to the entity.</i>	Total facility amount at quarter end \$A'000	Amount drawn at quarter end \$A'000
7.1	Loan facilities	-	-
7.2	Credit standby arrangements	-	-
7.3	Other (funding support arrangement)	98,500	68,215
7.4	Total financing facilities	98,500	68,215
7.5	Unused financing facilities available at quarter end		30,285
7.6	Include in the box below a description of each facility above, including the lender, interest rate, maturity date and whether it is secured or unsecured. If any additional financing facilities have been entered into or are proposed to be entered into after quarter end, include a note providing details of those facilities as well. Ardea has entered into a Cooperation Agreement and Shareholders's Agreement with a Japanese consortium to form a joint venture to develop the Kalgoorlie Nickel Project - Goongarrie Hub (Ardea ASX announcements: 26 April 2024 and 2 September 2024). The Consortium will fund 100% of the DFS costs up to the agreed budget of approximately A\$98.5 million. At the conclusion of the DFS spend, the Consortium will have subscribed to a 35% ownership in KNPL and retain the right to increase its ownership in KNPL to 50% upon a positive Final Investment Decision (FID) decision by the Consortium to build, commission and operate a plus 30,000tpa multi-decade nickel operation. On 26 April 2024, Ardea, Ardea's subsidiary Kalgoorlie Nickel Pty Ltd (KNPL) and Sumitomo Metal Mining Co. Ltd (SMM) agreed funding support arrangements to facilitate the progression of the early DFS works while the conditions precedent to the Cooperation Agreement are being satisfied. Under the funding support arrangements, the parties have agreed a contribution plan under which SMM will advance up to A\$12,000,000 in funding to KNPL, as and when funds are required to facilitate agreed early DFS works. This funding support agreement has ceased upon the signing of the Shareholders's Agreement – with the Consortium funding 100% of the DFS costs up to the agreed budget of approximately A\$98.5 million.		

8.	Estimated cash available for future operating activities	\$A'000
8.1	Net cash from / (used in) operating activities (item 1.9)	(17,897)
8.2	(Payments for exploration & evaluation classified as investing activities) (item 2.1(d))	-
8.3	Total relevant outgoings (item 8.1 + item 8.2)	(17,897)
8.4	Cash and cash equivalents at quarter end (item 4.6)	15,554
8.5	Unused finance facilities available at quarter end (item 7.5)	30,285
8.6	Total available funding (item 8.4 + item 8.5)	45,839
8.7	Estimated quarters of funding available (item 8.6 divided by item 8.3)	2.56
	<i>Note: if the entity has reported positive relevant outgoings (ie a net cash inflow) in item 8.3, answer item 8.7 as "N/A". Otherwise, a figure for the estimated quarters of funding available must be included in item 8.7.</i>	
8.8	If item 8.7 is less than 2 quarters, please provide answers to the following questions: 8.8.1 Does the entity expect that it will continue to have the current level of net operating cash flows for the time being and, if not, why not? Answer: N/A	

Mining exploration entity or oil and gas exploration entity quarterly cash flow report

8.8.2 Has the entity taken any steps, or does it propose to take any steps, to raise further cash to fund its operations and, if so, what are those steps and how likely does it believe that they will be successful?

Answer: N/A

8.8.3 Does the entity expect to be able to continue its operations and to meet its business objectives and, if so, on what basis?

Answer: N/A

Note: where item 8.7 is less than 2 quarters, all of questions 8.8.1, 8.8.2 and 8.8.3 above must be answered.

Compliance Statement

- 1 This statement has been prepared in accordance with accounting standards and policies which comply with Listing Rule 19.11A.
- 2 This statement gives a true and fair view of the matters disclosed.

Date: 28 October 2025

Authorised by: Ardea Board of Directors

Notes

1. This quarterly cash flow report and the accompanying activity report provide a basis for informing the market about the entity's activities for the past quarter, how they have been financed and the effect this has had on its cash position. An entity that wishes to disclose additional information over and above the minimum required under the Listing Rules is encouraged to do so.
2. If this quarterly cash flow report has been prepared in accordance with Australian Accounting Standards, the definitions in, and provisions of, *AASB 6: Exploration for and Evaluation of Mineral Resources* and *AASB 107: Statement of Cash Flows* apply to this report. If this quarterly cash flow report has been prepared in accordance with other accounting standards agreed by ASX pursuant to Listing Rule 19.11A, the corresponding equivalent standards apply to this report.
3. Dividends received may be classified either as cash flows from operating activities or cash flows from investing activities, depending on the accounting policy of the entity.
4. If this report has been authorised for release to the market by your board of directors, you can insert here: "By the board". If it has been authorised for release to the market by a committee of your board of directors, you can insert here: "By the [name of board committee – eg Audit and Risk Committee]". If it has been authorised for release to the market by a disclosure committee, you can insert here: "By the Disclosure Committee".
5. If this report has been authorised for release to the market by your board of directors and you wish to hold yourself out as complying with recommendation 4.2 of the ASX Corporate Governance Council's *Corporate Governance Principles and Recommendations*, the board should have received a declaration from its CEO and CFO that, in their opinion, the financial records of the entity have been properly maintained, that this report complies with the appropriate accounting standards and gives a true and fair view of the cash flows of the entity, and that their opinion has been formed on the basis of a sound system of risk management and internal control which is operating effectively.

Notes:

1. Britannia Gold Ltd retains precious metal rights.
2. Impress Ventures Ltd has a 10% equity free-carried interest to a decision to mine.
3. Norton Gold Fields Limited retains certain Au claw-back rights and royalty receivable.
4. Ora Banda Mining Ltd holds Au-Ag rights while Ardea retains all non Au-Ag rights.
5. Acra – Held by Essential Metals Limited, wholly owned subsidiary of Develop Global. Ardea retains rights to Ni laterite ore.
6. Black Mountain Gold Limited all rights with exception of Ardea retaining Ni rights.
7. Ramelius Resources Limited assignee (Maximus Resources Ltd) all rights, Ardea pre-emptive right to Ni-Co laterite.
8. Paddington Gold Pty Ltd all mineral rights (except nickel sulphide) while Ardea retains rights to nickel laterite ore.
9. By Sale Agreement between Northern Star (Carosue Dam) Pty Ltd and Kalnorth Gold Mines Ltd, Northern Star (Carosue Dam) Pty Ltd now owns Au rights while Ardea retains non-Au rights.
10. Northern Star (Kanowna) Limited holds Au rights. Ardea retains non-Au rights.
11. The Option to purchase the tenements was transferred to Arika Resources Limited (renamed from Metalicity Limited) on 21 November 2020. Ardea retains non Au rights. By a Deed of Covenant, Assignment & Assumption dated 30 July 2025, Ardea has assigned and Kalgoorlie Nickel Pty Ltd has assumed Ardea's rights under the Option agreement.
12. The Mt Zephyr/Darlot East tenements were farmed out to Red 5 Limited on 18 November 2020 whereby Red 5 Limited earned 80% equity interest. Red 5 Limited merged with Silver Lake Resources Limited in late 2024 and the combined entity is known as Vault Minerals Limited. Ardea is free carried to Decision to Mine.
13. Purchase of tenements by Binding Terms Sheet and Alluvial Rights Agreements dated 4 June 2021 between the Seller Steven Lionel Kean and Ardea Resources Limited. Ardea retains non Au rights.
14. By way of the Demerger Implementation Deed executed between Ardea Resources Limited, Kalgoorlie Gold Mining Limited, Yerilla Nickel Pty Ltd, Kalgoorlie Nickel Pty Ltd and Ardea Exploration Pty Ltd dated 9 September 2021, certain tenements have been transferred to Kalgoorlie Gold Mining Limited. For certain other tenements, Ardea Resources Limited or its subsidiaries will continue to hold and retain non-gold rights while Kalgoorlie Gold Mining Limited retains gold rights only.
15. Tenement Swap Agreement between Brightstar Resources Limited subsidiaries, Goongarrie Operational and Mining Pty Ltd and Menzies Operational and Mining Pty Ltd, and Ardea Resources Limited subsidiary, Kalgoorlie Nickel Pty Ltd dated 15 July 2023. E29/1062 Infrastructure Rights only. E29/981, Brightstar has lithium and gold rights.
16. The Japanese Consortium may acquire 50% equity of Kalgoorlie Nickel Pty Ltd, being the tenement holder, by completing the Goongarrie Hub DFS and making a positive FID, refer to ASX announcements 26 April 2024 and 30 August 2024. During the current Quarter, the Japanese Consortium has earned a combined holding of 17.5% in Kalgoorlie Nickel Pty Ltd (ASX Announcement 4 July 2025) having successfully expended 50% of its DFS funds.

Interests in Mining Tenements and Petroleum Tenements Acquired or Increased during the September Quarter 2025
